PROFESSIONAL SUMMARY

AI Engineer and Backend Developer experienced in building production SaaS products, AI-powered applications, REST APIs, microservices, and cloud-deployed systems. Strong in Python, FastAPI, React, Next.js, MongoDB, PostgreSQL, Redis, Convex, Supabase, Docker, Vercel, Cloudflare, and third-party AI APIs. Built products from 0 to production including a recruitment SaaS used by 5,000+ candidates and a sales outreach platform. Experienced in system design, backend architecture, deployment, performance optimization, client handling, technical leadership, and AI-assisted software engineering.

EXPERIENCE

True Value Infosoft Pvt. Ltd.

May 2025 – Present

AI Engineer / AI/ML Intern / Trainee (May–Dec 2025), Full-Time (Jan 2026–Present)

Jaipur, India

- Build production AI and backend systems using **Python, FastAPI, REST APIs, MongoDB, PostgreSQL, React, and third-party AI services**.
- Built **Hiro** end-to-end from frontend and backend to database, authentication, AI integrations, hosting, and production deployment; platform reached **5,000+ candidates**.
- Implemented recruitment automation covering resume processing, AI screening, assessments, text and voice interviews, anti-cheat, testing, offer letters, and candidate communication.
- Developed **Salezo**, a sales outreach platform for multi-source lead capture and automated prospect outreach using WhatsApp, RCS, SMS, email, and external platforms.
- Built AI chatbots, voice-call agents, document-processing workflows, n8n automations, and LLM-powered business applications.
- Built software solutions from scratch for a government-sector client across **8 locations**, handling development, deployment, troubleshooting, and production support.
- Led technical execution and coordinated teams of up to **15+ members**; handled client requirements, technical discussions, demos, delivery coordination, and issue resolution.
- AI-Assisted Engineering:** Started using Claude extensively in December 2025 and shifted to **Claude Code as the primary development workflow in March 2026**, after previously using Cursor. Use AI tools for implementation, refactoring, debugging, test generation, documentation, code review, and technical exploration, while validating generated output and owning architecture, business logic, security, testing, and production decisions.

eAdmin Business Process Pvt. Ltd.

Jul 2024 – Apr 2025

Trainee → Full Stack Developer

Jaipur, India

- Developed backend APIs, authentication, database integrations, and frontend features using Python, FastAPI, Django, React, Flutter, PostgreSQL, and MongoDB.
- Worked with engineering teams to translate business requirements into production-ready features and resolve application issues.

SELECTED PROJECTS

Hiro – Resume Management & Recruitment SaaS [Live]

FastAPI, React, MongoDB, AI APIs

- Owned development from **0 to production**; implemented resume processing, AI screening, assessments, voice/text interviews, anti-cheat, offer letters, and recruitment workflows.
- Reached **5,000+ candidates** in approximately six months.

Salezo – Sales Outreach & Lead Capture [Live]

FastAPI, React, AI, Automation

- Built multi-platform lead capture and sales outreach workflows with WhatsApp, RCS, SMS, email, and external lead platforms.

Agrivia – Agri Business Platform [Live]

Backend, APIs, Cloudflare, VPS

- Worked as lead backend developer; improved backend and production architecture for a platform supporting **100+ users** after significant performance issues.

Minaxi Marketing – Ecommerce Platform [Live]

Vercel, Cloudflare R2, Convex, Resend

- Built and deployed production ecommerce infrastructure using **Vercel, Cloudflare R2, Convex, and Resend**, including catalog, orders, wholesale, reviews, newsletter, and email workflows.

India's Online Talent (IOT) – Social Talent Platform

React, Backend APIs, Database

- Team lead for an Instagram-style talent platform focused on discovering and showcasing talent; coordinated technical decisions, development, integration, debugging, and delivery.

Government-Sector Multi-Location Solutions

Backend, APIs, Deployment

- Built and deployed solutions from scratch across **8 locations**, covering requirements, backend development, infrastructure, rollout, and production support.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++

Backend: FastAPI, Django, Flask, REST APIs, Microservices, Async Programming, JWT, Authentication, API Design

Frontend: React, Next.js, Flutter, HTML, CSS, Vite

Databases: MongoDB, PostgreSQL, Redis, Supabase, Convex, SQLite

AI/ML: LLM Integration, OpenAI APIs, AI Agents, Prompt Engineering, Machine Learning, Chatbots, Voice Agents, AI Automation

AI-Assisted Development: Claude Code, Claude, Cursor, AI Code Generation, AI Code Review, AI-Assisted Debugging, Test Generation, Output Validation

Automation & Integrations: n8n, WhatsApp APIs, RCS, SMS, Email APIs, Payment Gateways, Third-Party APIs

Cloud & DevOps: Docker, Linux, VPS, Vercel, Cloudflare, Cloudflare R2, Git, GitHub, Production Deployment

EDUCATION

Birla Institute of Technology and Science, Pilani (BITS Pilani)	2026 – Present
M.Tech in Artificial Intelligence and Machine Learning	India
Government Engineering College, Bikaner	2020 – 2024
B.Tech in Computer Science and Engineering CGPA: 8.5/10	India

ADDITIONAL EXPERIENCE

Freelance / Independent Development: Delivered **8+ software projects in 2026** including websites, ecommerce systems, MVPs, automation tools, demos, and installable applications. Experienced in direct client communication, requirement gathering, technical presentations, deployment, and project handover.

- Previously co-founded CodeRift during college and worked across web development, ecommerce, WordPress, Flutter, payment gateways, APIs, and cloud deployments.
- Built client demos, mockups, MVPs, websites, ecommerce applications, automation tools, and installable applications to support project onboarding and technical validation.
- Continuously developing backend and distributed-systems knowledge with focus on Redis, Celery, caching, background jobs, queues, scalability, and production architecture.

CORE AREAS

AI Engineering, Backend Development, Python, FastAPI, SaaS Development, REST APIs, Microservices, System Design, Database Architecture, LLM Applications, AI Agents, AI-Assisted Software Engineering, Cloud Deployment, Automation, Performance Optimization, Technical Leadership, Client Handling, Team Management
